Facts and Figures Committee, Vice Chairman

Analyst/Actuary @ Cefor, The Nordic Association of Marine Insurers

Global Marine Insurance Report 2009

- Global **Marine Insurance** – Overview
- Global **Hull** market
- Global **Cargo** market
- Global **Offshore Energy** Market
- Addendum (in download only):
Tables with underlying reported figures

Report on marine insurance premiums 2006 and 2007

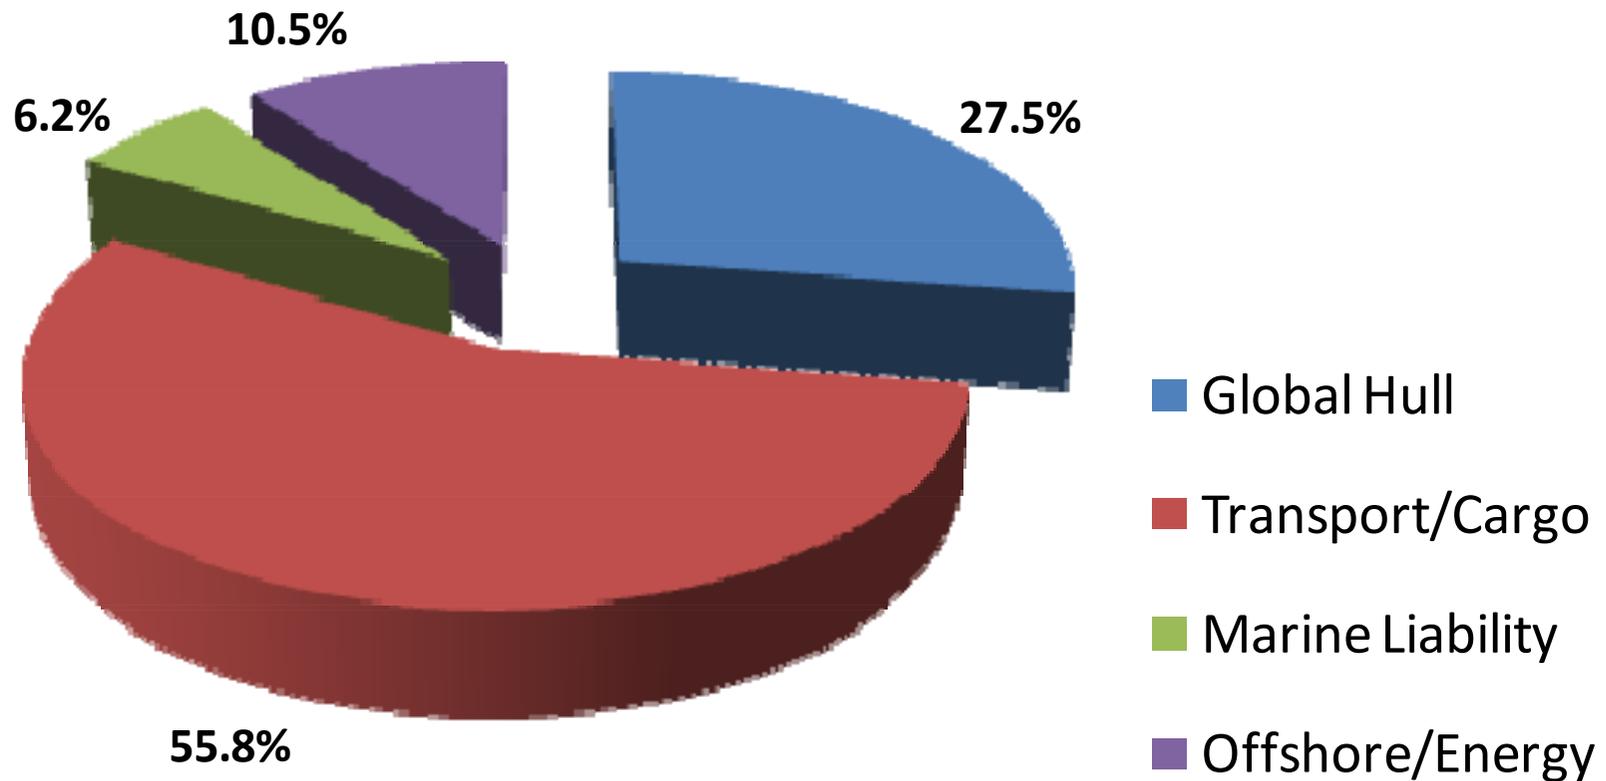

- By end of August 2009, 49 of 55 members reported their country's marine premium figures for accounting years 2007 and 2008.
- The reporting countries represent approximately 97% of the total marine premium written by all IUMI members.
- Total premium for 2008 is therefore estimated to reach approx. USD 22.9 billion*, a decrease of 3.6% from 2007 (excl. premium from mutual P&I Clubs).

Global Marine Premium 2008 by line of business

Total reported: 22.23 USD billion

2008

Total estimated including not reported: 22.9 USD billion

Global Marine premiums 2006-2008

(USD billions, as reported per end of August 2009)

	<u>Global Hull</u>	<u>Transport/Cargo</u>	<u>Marine Liability</u>	<u>Offshore/Energy</u>	<u>Total</u>
2008	6.112	12.410	1.367	2.334	22.223
2007	5.966	12.691	1.485	2.892	23.034
2006	5.282	10.724	1.381	2.736	20.124
Index 2006-2007*	12.2%	17.0%	6.7%	2.1%	13.0%
Index 2007-2008*	2.4%	-2.3%	-8.0%	-19.4%	-3.6%

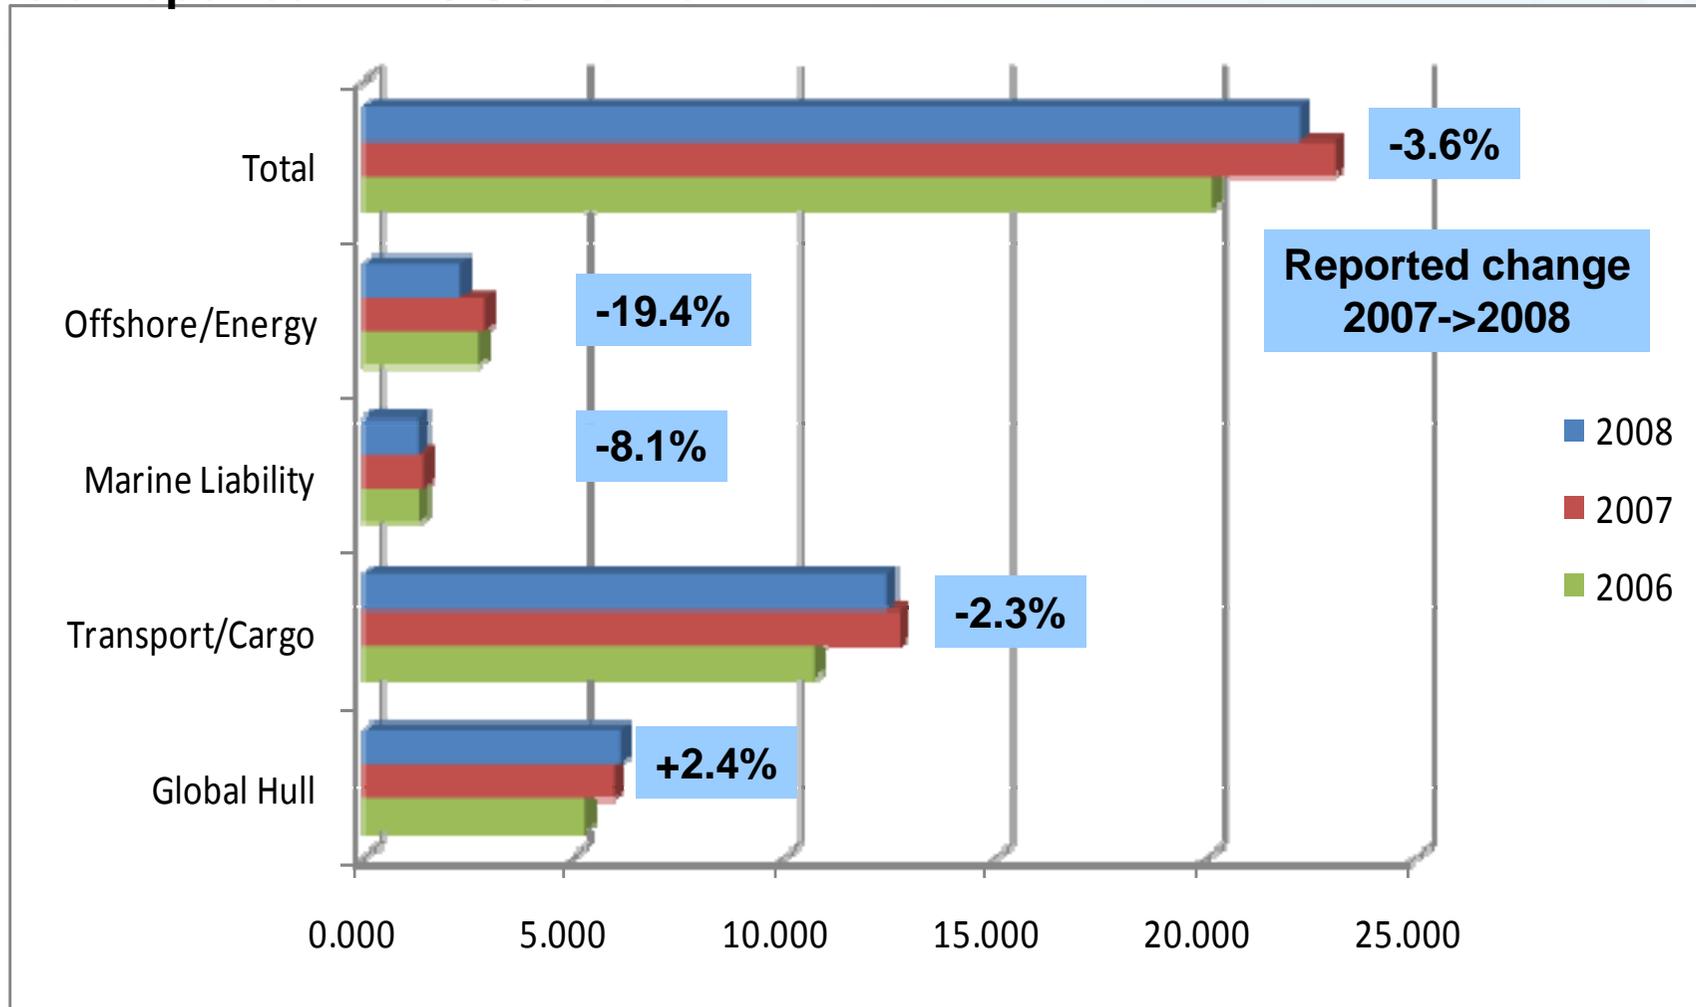

*Index based on figures from Associations who have reported in both years.
The index reflects changes in country activity, exchange rates in addition to premium increases and is thus not a renewal index!

As some countries only report total marine premium without splitting into classes, the sum of these classes might in some cases be slightly less than the "total" sum.

Global Marine premiums 2006 to 2008, as reported per accounting year

Total reported: 22.23 USD billion

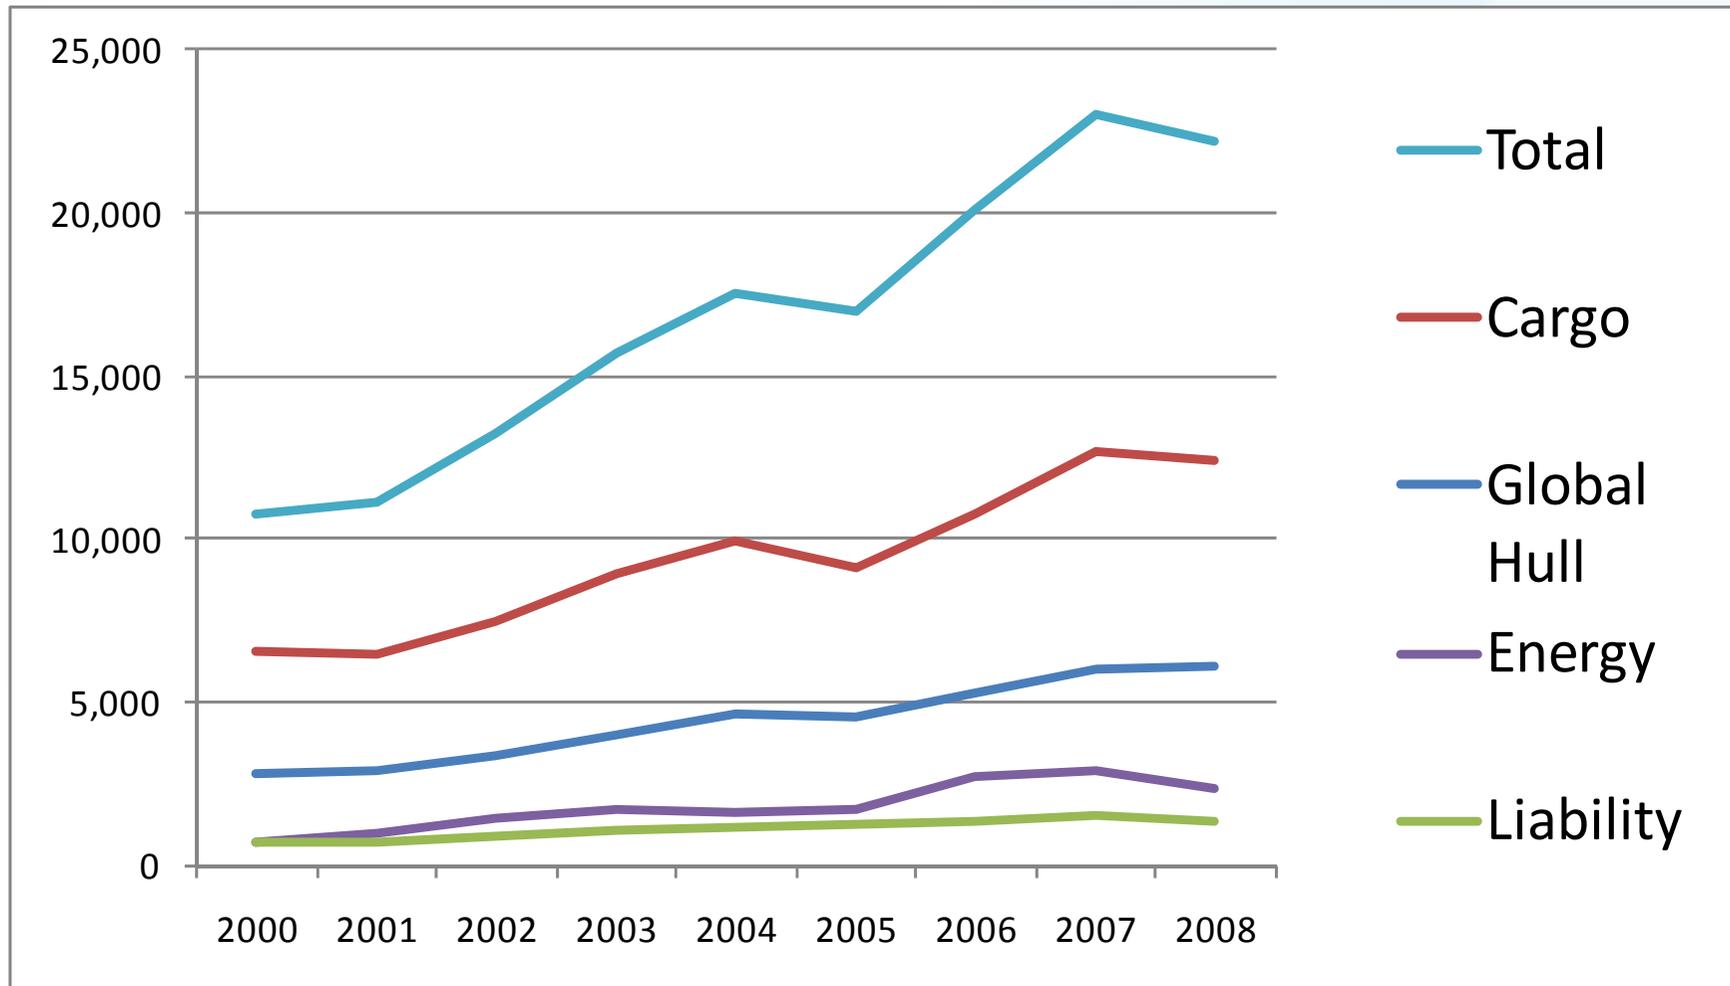

Increase 06-07 partly due to weakening of USD against European and Asian currencies.
Decrease 07-08 may be due to strengthening of USD against some major currencies.

Source: Norges Bank Exchange Rates Statistics

Marine Hull and Cargo/Transport Gross* Ultimate Loss Ratio

U/W Years 1997 to 2008

Hull 08: fewer major claims, but **uncertainty** as to effect of change in frame conditions on repair costs and ultimate results

* Technical break even is achieved when the gross loss ratio does not exceed 100% minus the expense ratio (usually 20% to 30% acquisition costs, capital costs, management expenses)

Summing up Hull – until 2008...

- **Frame conditions**
 - World trade and world fleet increasing
 - Steel prices up (-> hull repairs!)
 - Repair yard capacity not sufficient (-> repair cost!)
 - Exchange rate effects on repair cost

- **Major claims**
 - Strong impact in 2006! and 2007
 - Some relief in 2008

- **Repair cost / Attritional losses**
 - Increase in average repair cost 2004 to 2008

- **Claim frequency**
 - Increasing from 2006, after long period of stability

And Hull into 2009...

- **Frame conditions: change dramatically 4Q 2008**
 - Reduction in world trade/values/freight rates
 - Steel price down / oil price down
 - Many vessels in lay-up
 - But world fleet still increasing, due to previous orders

- **Effects on Hull Insurance**
 - Reduction in insured vessel values

- **But positive effect on hull repairs (?)**
 - Steel prices down
 - Better capacity at repair yards
 - More time for maintenance ?
 - Better availability of qualified seafarers ?

And the future for Hull...

- **Future Global Hull Market will depend on**
 - Adjustment of rates to match expected claim cost in combination with reduction in vessel values
 - No. of vessels in lay-ups, scrapped, new builds
 - Market discipline / capacity
(in 2009 signs towards more prudent underwriting)
 - Effect of changes in frame conditions on repair cost
 - and as always: the impact of major claims

Summing up Cargo

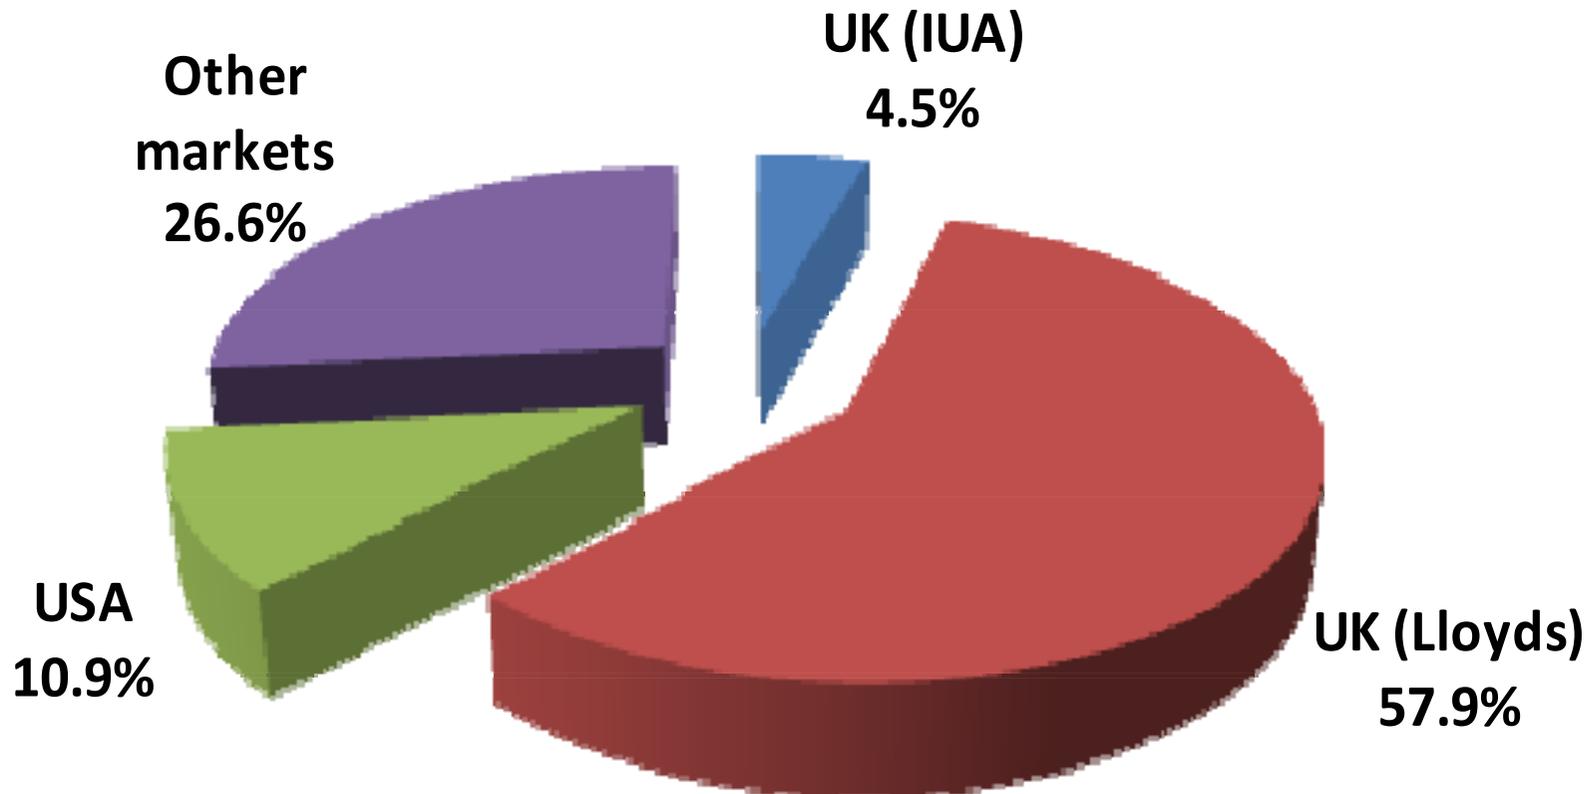

- Dramatical reduction in **insured values**, with respective effect on cargo income.
- Will **claim amounts** be proportionally reduced?
Not too sure because of increasing
 - Accumulation
 - Moral hazard
 - Theft frequency
- Knowing 2008 is close to breakeven, uncertainties on the profitability of 2009.

Global Offshore Energy Premium by markets

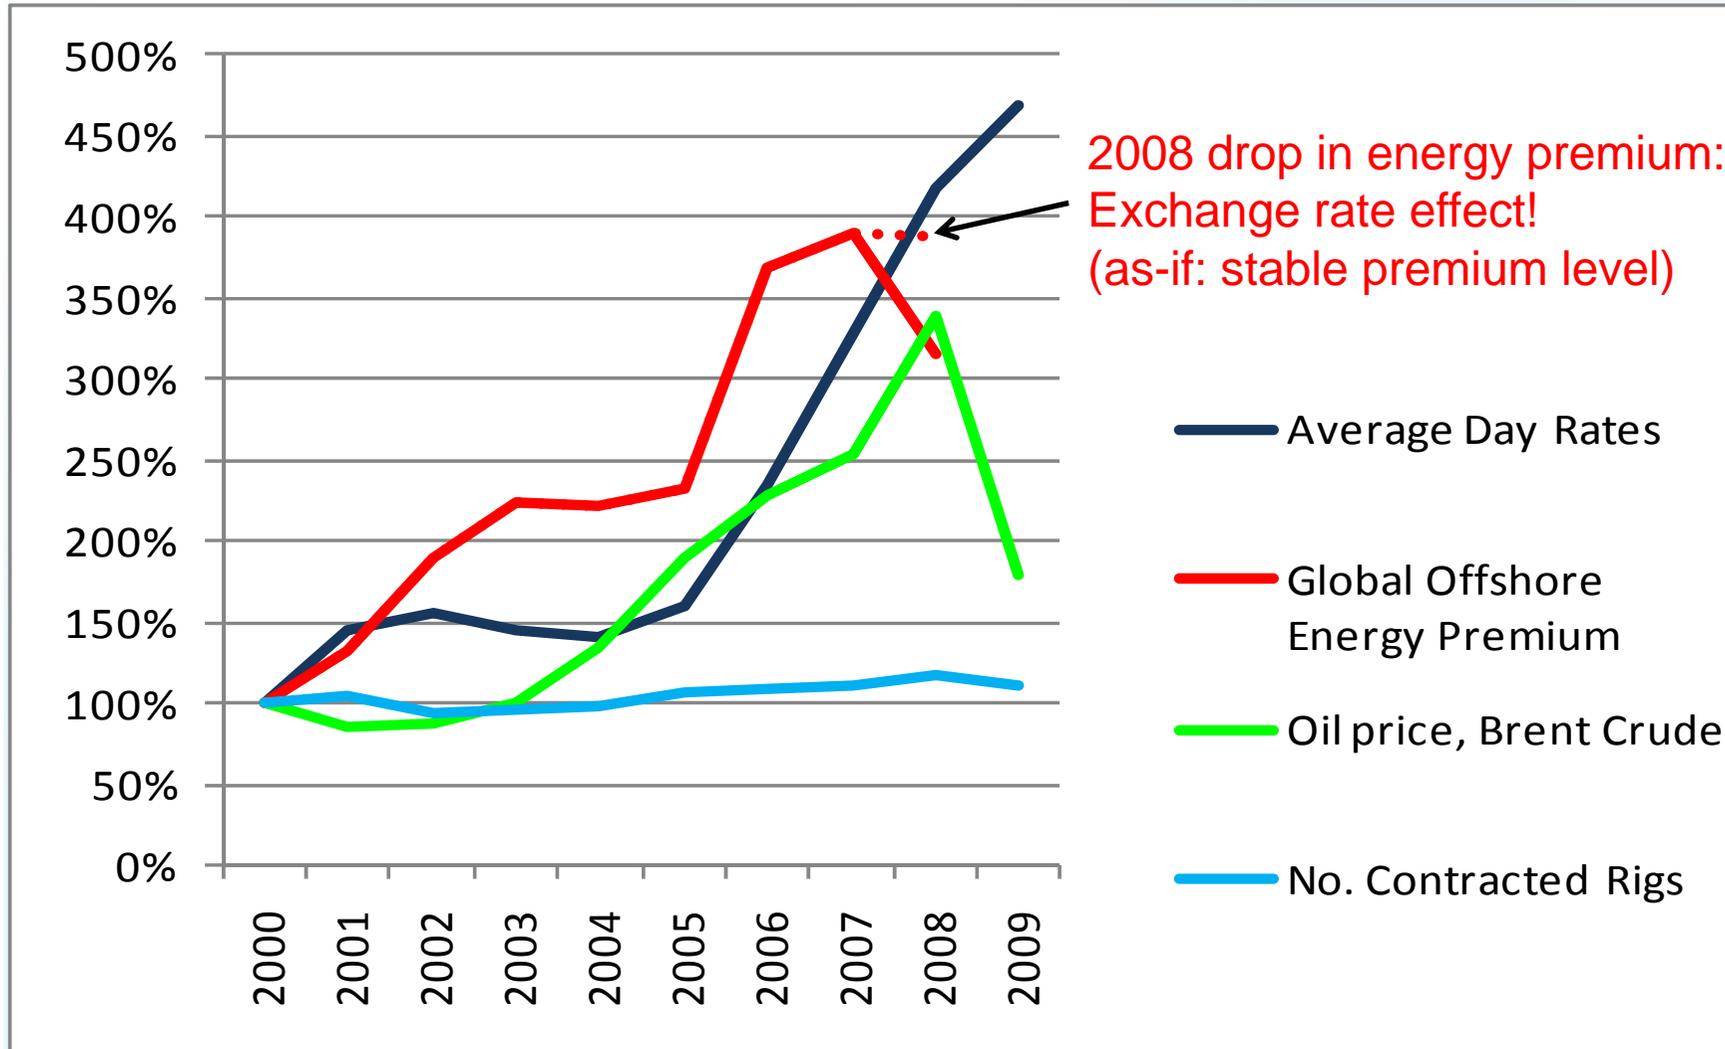

Total: 2.3 USD billion

2008

Energy Mobiles, Day rates, Oil Price Global Offshore Energy Premium

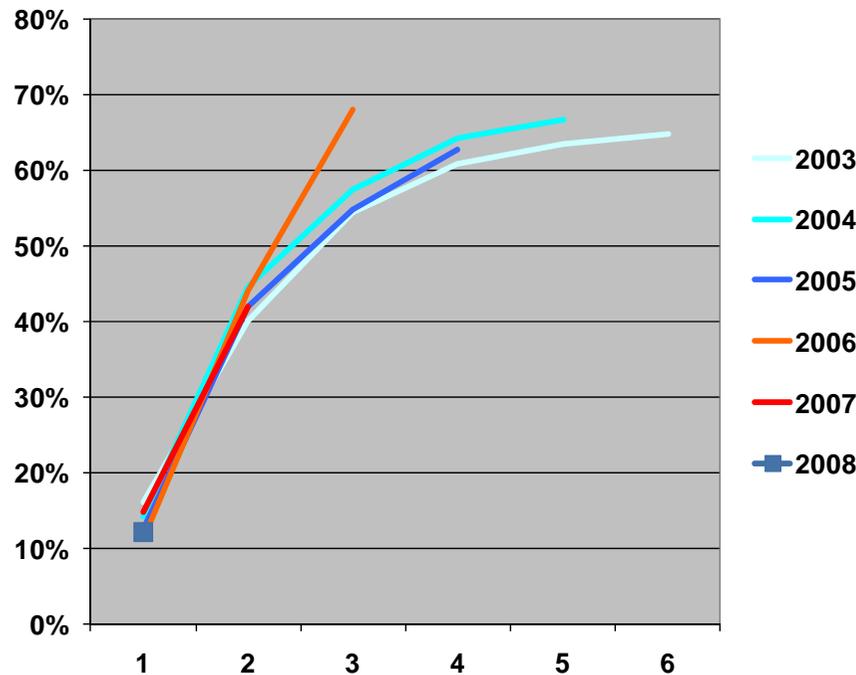

Index of evolution, 2000 = 100%

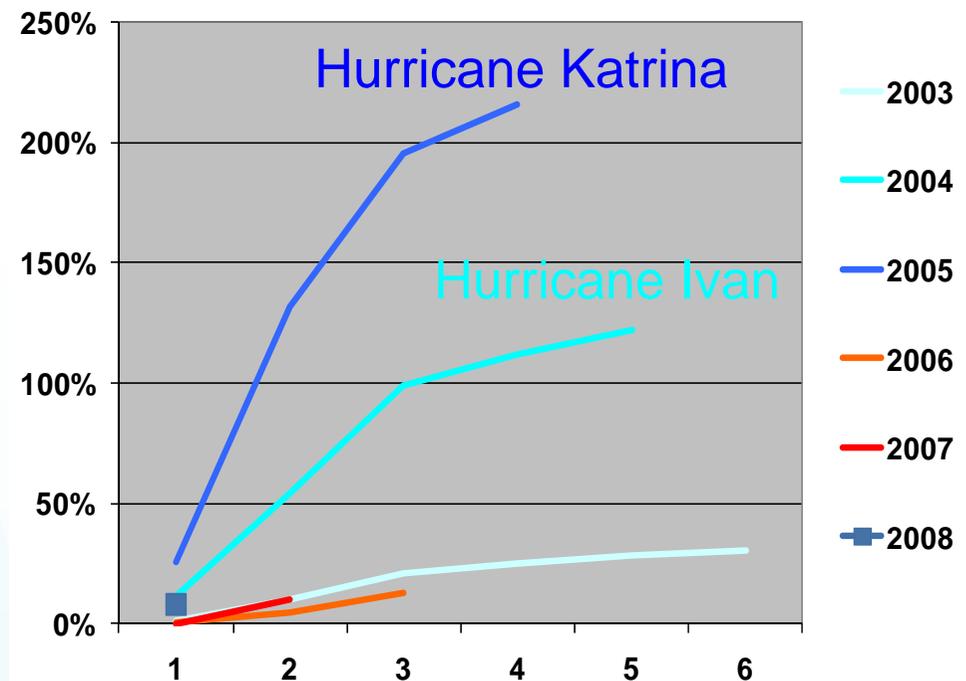

Hull versus Offshore Energy

Development of Gross "Paid" Loss Ratios

per UW year, as reported at 1, 2, 3, 4, 5 and 6 years

Hull

Energy

**A "typical" loss development pattern for Energy?
-> need to analyse Hurricanes separately...**

Summing up Offshore Energy

- Extremely volatile business, results/profitability depend strongly on hurricane impact
- Long time lag between accident and claims payment, due to the technical complexity of the insured objects
- No regular claims patterns. Claims reserves are set depending on knowledge about individual claims.
- Rates and Terms & Conditions have significantly improved since 2001 and following recent hurricane activity in the Gulf of Mexico

Reported Marine Premium

- **by market**
- **by marine line of business**
- **Accounting years 2007 and 2008**

UK Lloyd's: Projected ultimate underwriting year premium, after deduction of acquisition costs, but including proportional and facultative reinsurance. Acquisition cost ratio is estimated to be ca. 20-25% for most years. Marine Liability includes P&I premium via International Group's reinsurance programme, which is estimated to be about 65% of the reported liability premium. All historical figures revised in 2008.

Reported Gross Loss Ratios

Ladder tables

- for Hull, Cargo, Energy
- by Underwriting year

Marine Hull – Evolution of Paid Claims, Gross Premiums as reported, U/W Year 2001 to 2008 (USD)

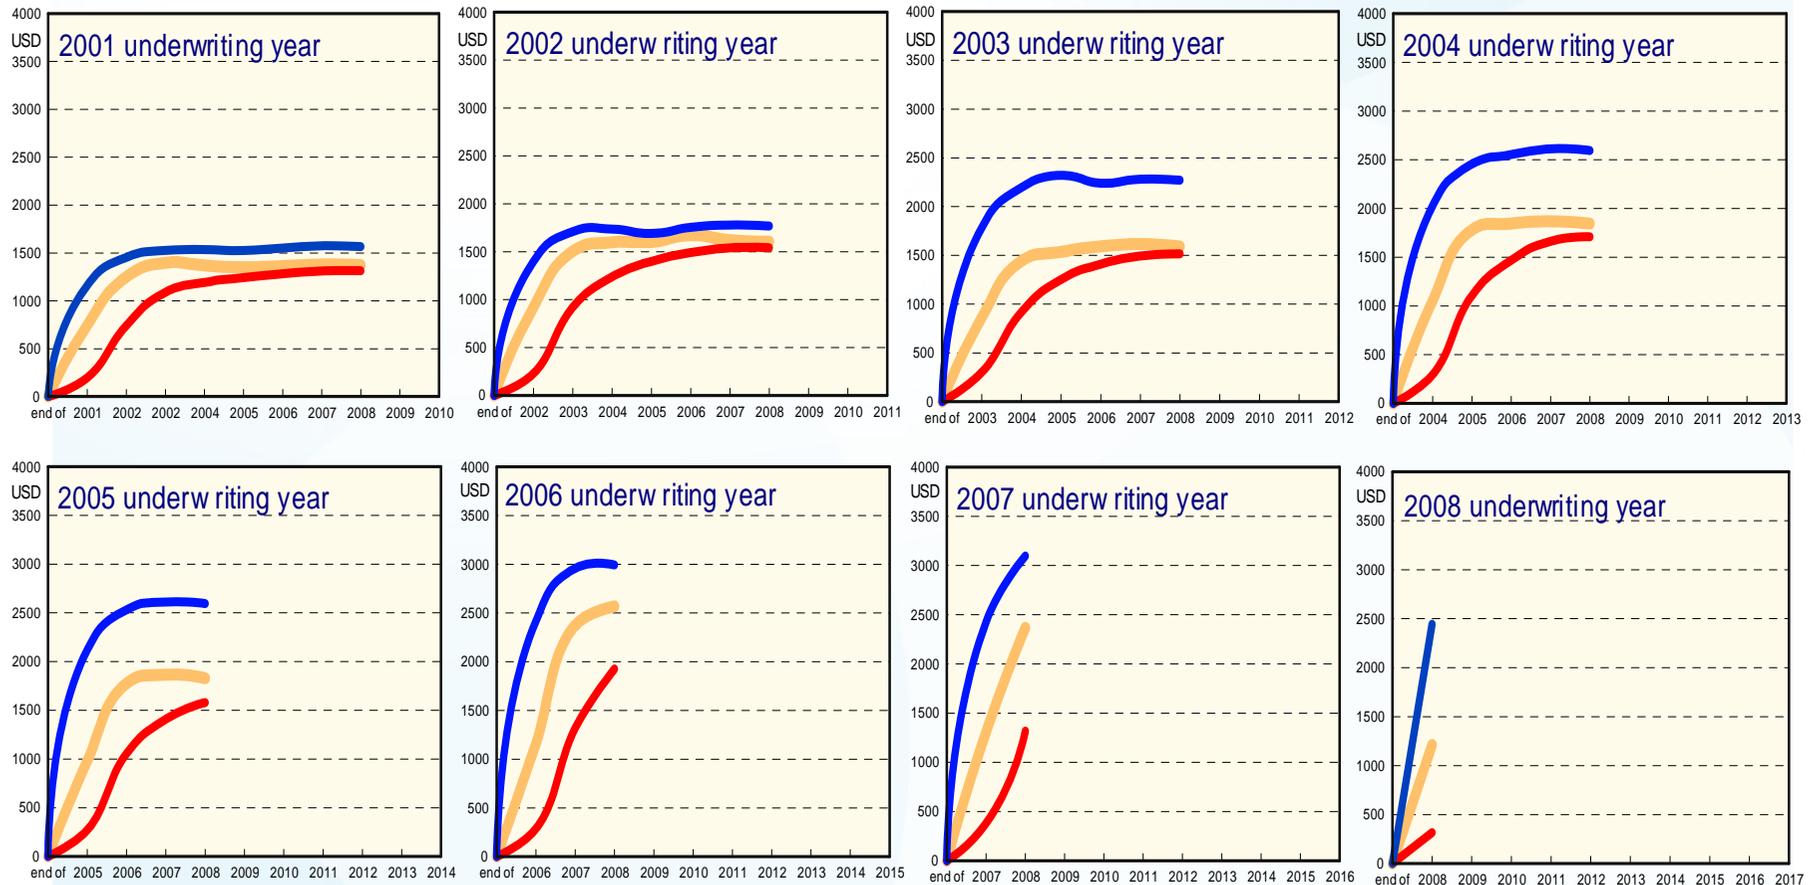

Blue line = Gross Premium; Red line = Paid Claims

Totals of 10 IUMI members – Belgium, France, Germany, Italy, Netherlands, Nordic Cefor, Spain, UK Lloyds & IUA, USA

Marine Hull – Evolution of Paid and Total Claims, Gross Premiums

as reported, U/W Year 2001 to 2008 (USD)

Blue line = Gross Premium; Red line = Paid Claims, Yellow line = Paid+Outstanding claims

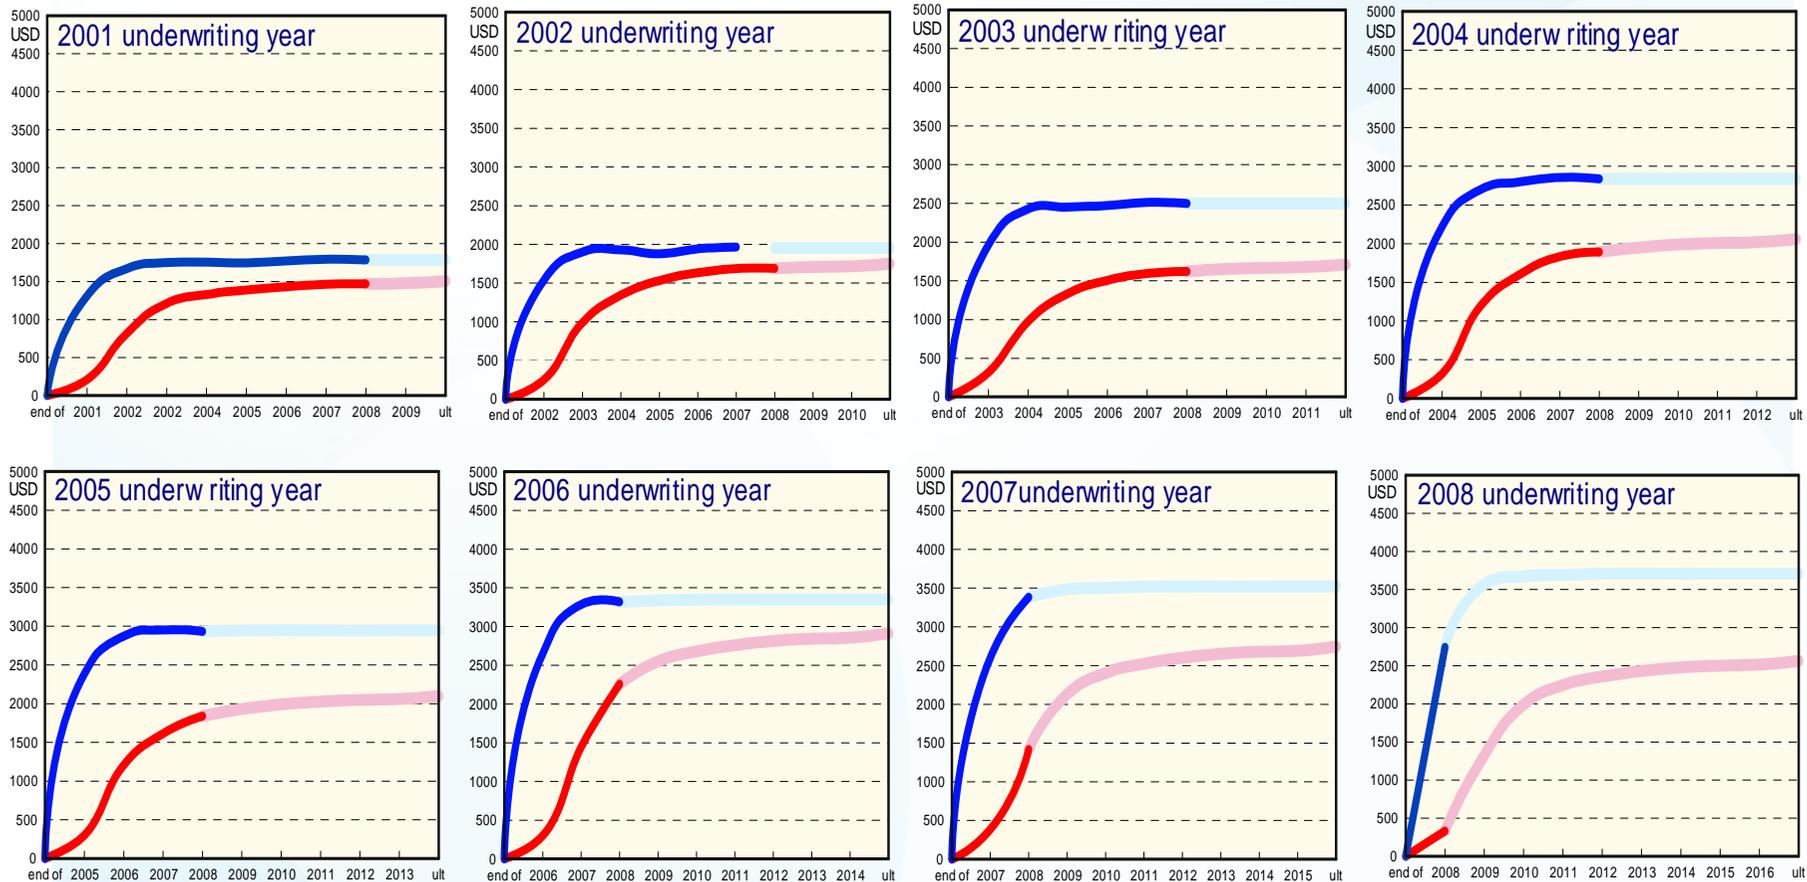

Totals of 9 IUMI members –

Belgium, France, Germany, Italy, Netherlands, Nordic Cefor, Spain, UK Lloyds, USA

Marine Hull – Evolution of Paid Claims, Gross Premiums

with estimation towards ultimate, U/W Year 2001 to 2008 (USD)

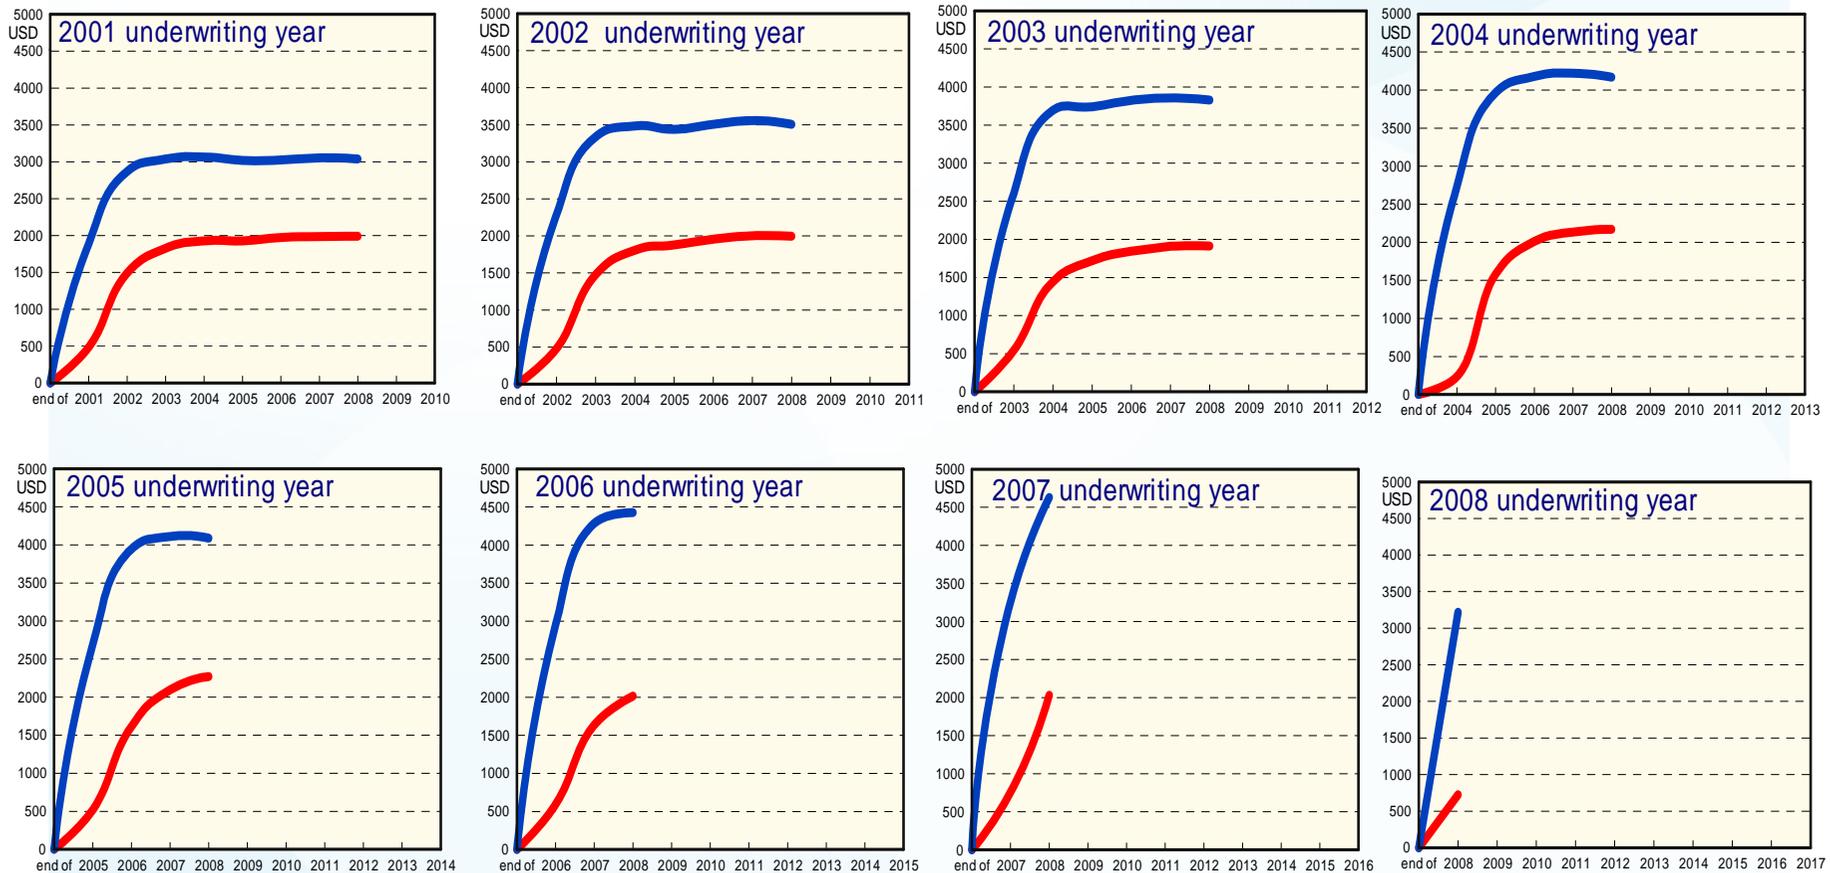

Blue line = Gross Premium; Red line = Paid Claims

Totals of 10 IUMI members –
Belgium, France, Germany, Italy, Netherlands, Nordic Cefor, Spain, UK Lloyds & IUA, USA

Transport/Cargo – Evolution of Paid Claims, Gross Premiums

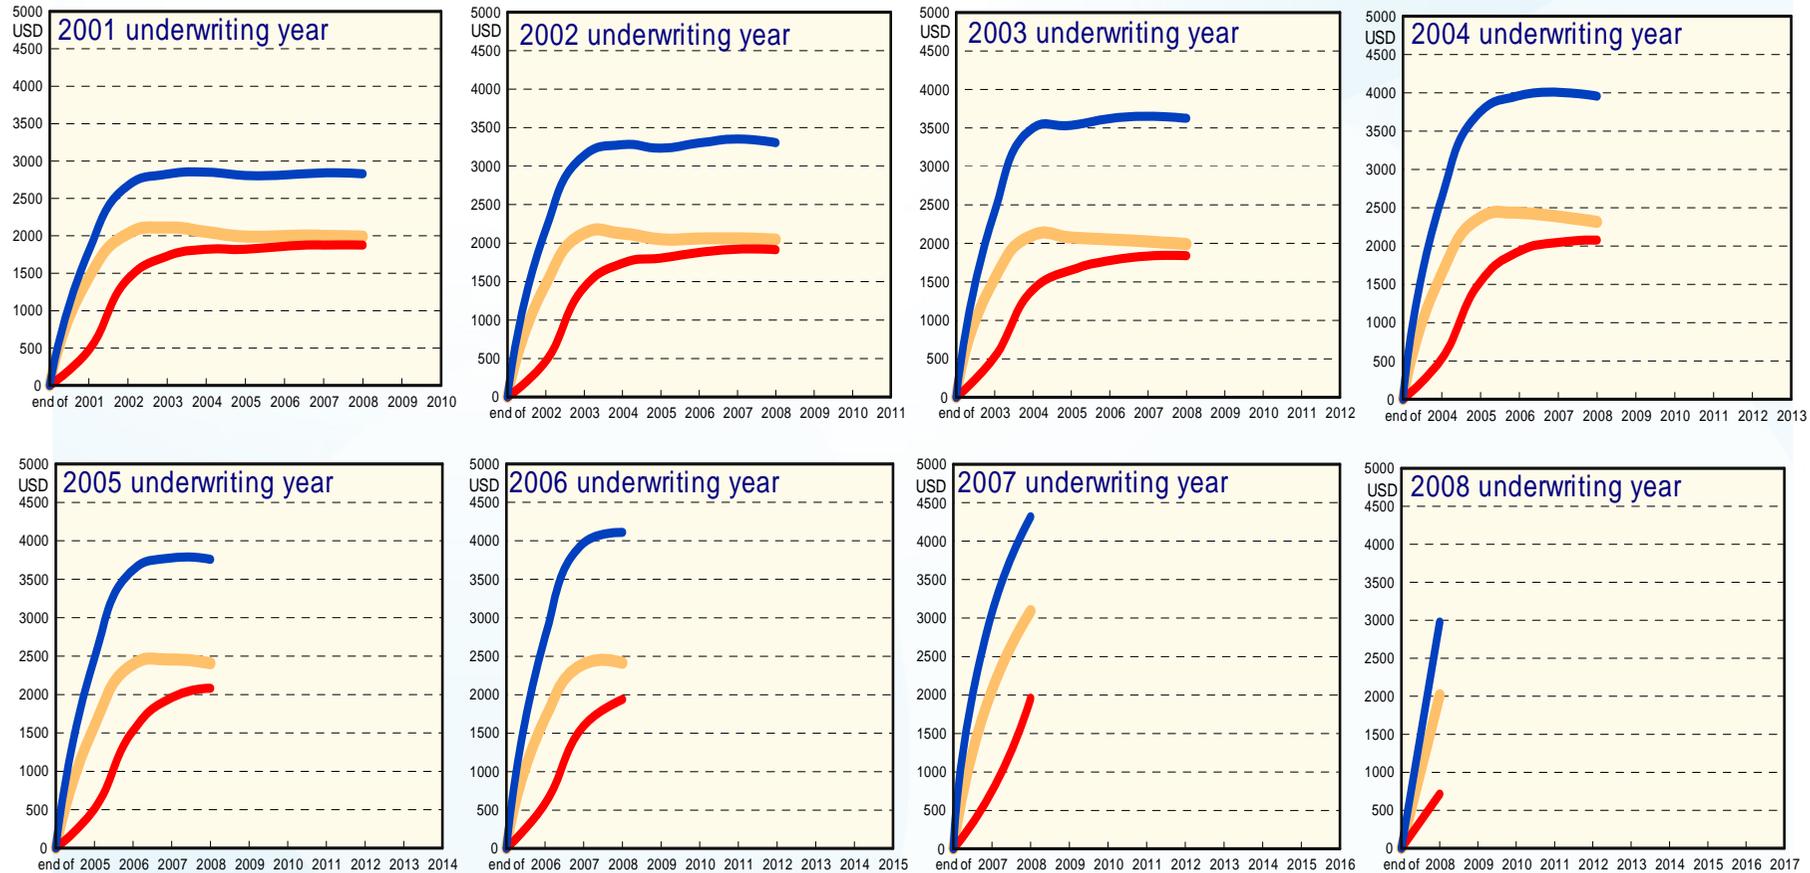

as reported, U/W Year 2001 to 2008 (USD)

Blue line = Gross Premium; Red line = Paid Claims

Totals of 9 IUMI members – Belgium, France, Germany, Italy, Netherlands, Spain, UK Lloyds & IUA, USA

Transport/Cargo – Paid and Total Claims, Gross Premiums as reported, U/W Year 2001 to 2008 (USD)

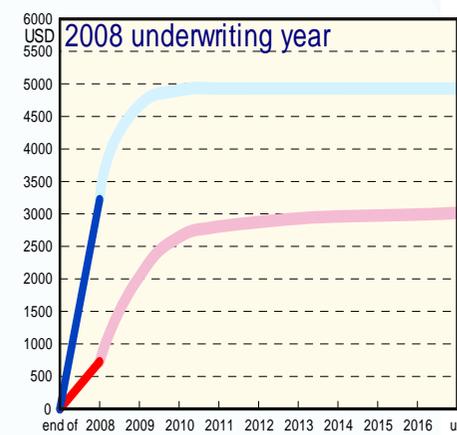

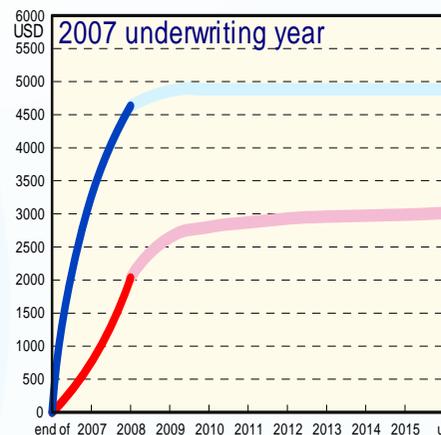

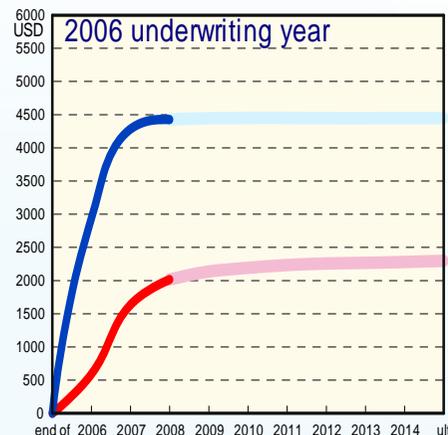

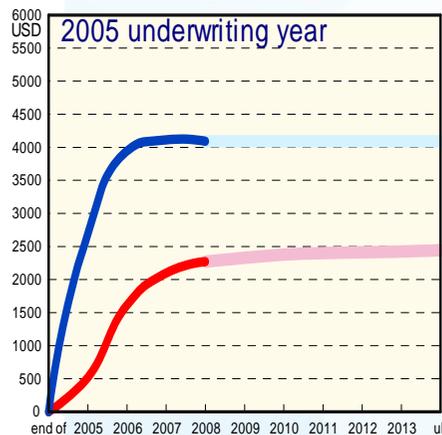

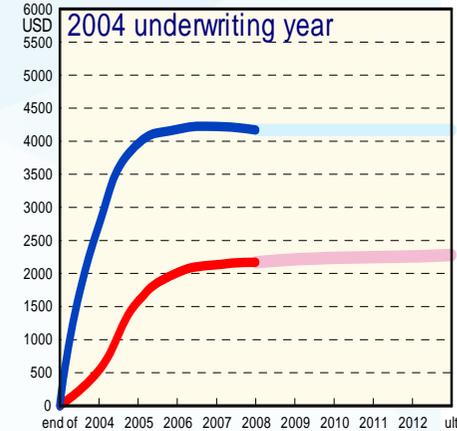

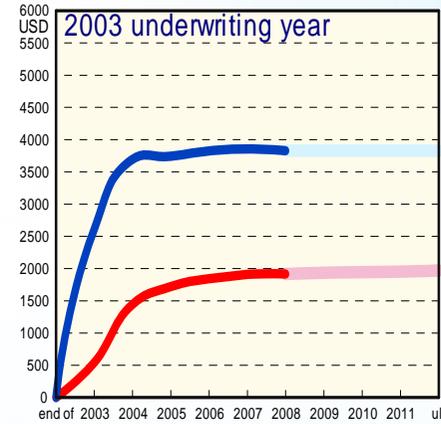

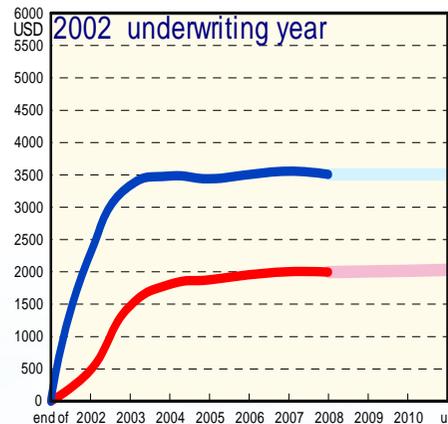

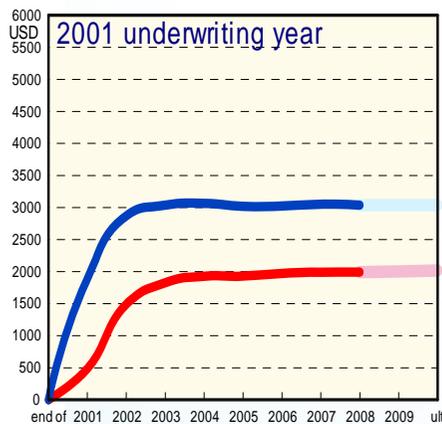

Blue line = Gross Premium; Red line = Paid Claims, Yellow line = Paid+Outstanding claims

Totals of 8 IUMI members – Belgium, France, Germany, Italy, Netherlands, Spain, UK Lloyds, USA

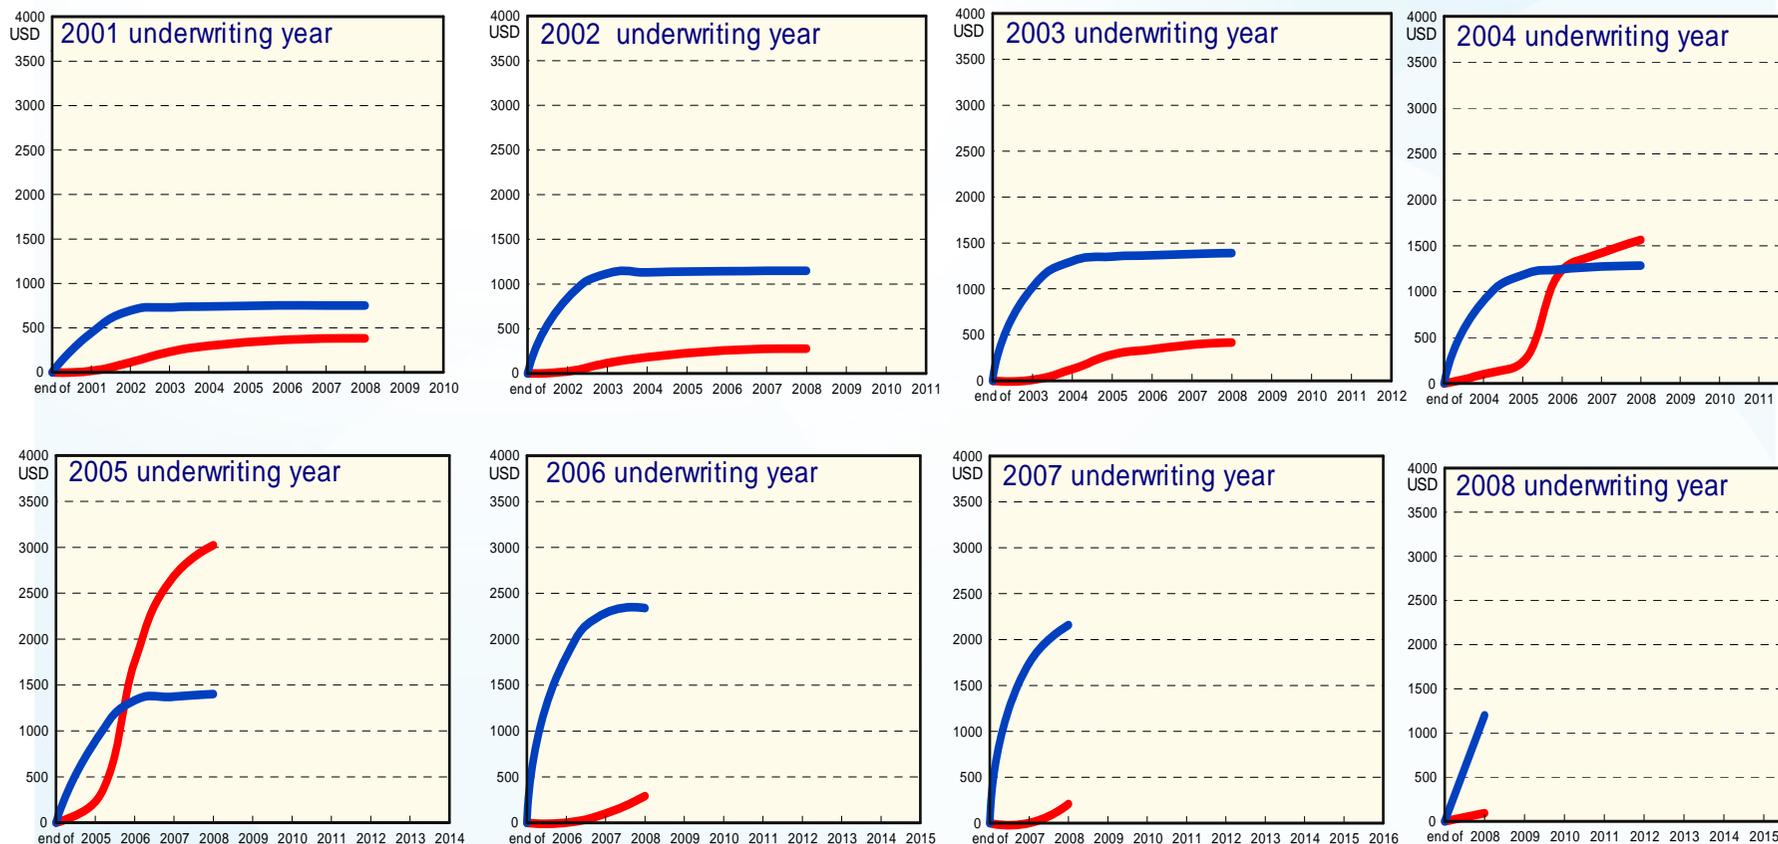

Transport/Cargo – Evolution of Paid Claims, Gross Premiums with estimation towards ultimate, U/W Year 2001 to 2008 (USD)

Blue line = Gross Premium; Red line = Paid Claims

Totals of 9 IUMI members – Belgium, France, Germany, Italy, Netherlands, Spain, UK Lloyds & IUA, USA

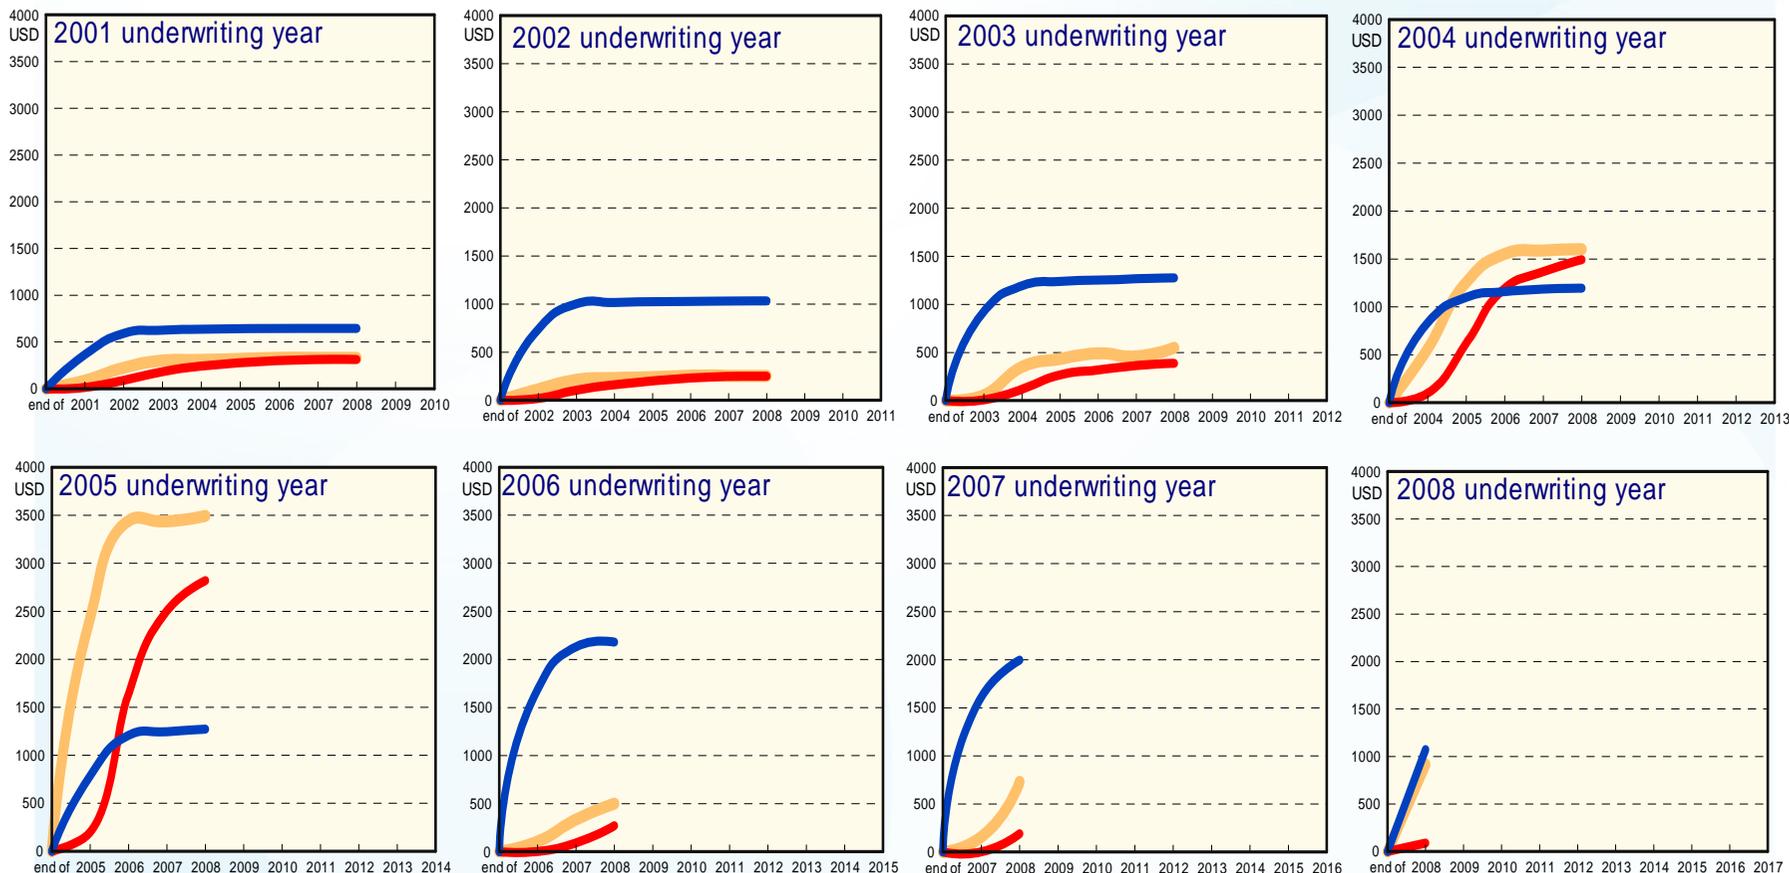

Offshore Energy – Evolution of **Paid Claims**, Gross Premiums as reported, U/W Year 2001 to 2008 (USD)

Blue line = Gross Premium; Red line = Paid Claims

Totals of 3 IUMI members – UK Lloyds & IUA, USA

Offshore Energy – Paid and Total Claims, Gross Premiums as reported, U/W Year 2001 to 2008 (USD)

Blue line = Gross Premium; Red line = Paid Claims , Yellow line = Paid+Outstanding claims
Totals of 3 IUMI members – UK Lloyds & IUA, USA

Explanation of terms used in this presentation (1)

Gross premium = Premium for insurance including the provision for anticipated losses (the pure premium) and for the anticipated expenses (loading), including also commission and brokerage but excluding taxes and other contributions on insurance premiums.

Written premium = Complete premium due for insurance policies which start, i.e. “are written”, in a specific year (= the underwriting year of the policy). Does not give any information on actual premium payments/instalments, i.e. the cash flow.

Paid claims = Amounts the insurer has paid for known and registered claims less recoveries.

Outstanding claims reserve = Claims reserve for specific reported, but not yet (fully) paid claims, of which the insurer has an estimation of the total amount to be paid. Includes loss adjustment expenses.

= Sum of total claims estimates minus any amounts already paid for these claims.

Total claim = Paid amounts + outstanding claims reserve for specific reported claims.

IBNR = “Incurred but not reported” = additional claims reserve on top of the outstanding claims reserve, and which for claims incurred, but not yet known or registered in the insurer’s system. The necessary IBNR reserve is derived by statistical methods based on historical claims ladder statistics.

Loss ratio = Claims divided by premiums. Indicator of whether premiums are calculated correctly to match claims and other expenses.

Gross loss ratio (in this presentation) = Sum of total claims and IBNR reserves, divided by gross written premiums

Underwriting year basis = Insurance figures are registered with the calendar year in which the insurance policy starts, and to which the covered risks accordingly attach to. Example: a policy with cover period 01.07.06-30.06.07 has underwriting year 2006. Both claims occurring in 2006 and 2007 for risks attaching to this policy are thus attributed to underwriting year 2006. The underwriting year is not closed, so underwriting year figures change as long as there are payments related to policies with this underwriting year.

Accident year = Claims are registered with the calendar year in which an accident happens. Claims attaching to the same policy may thus be attributed to different accident years. Example: for the policy with cover period 01.07.06-30.06.07 a claim occurring in 2007 has accident year 2007, but underwriting year 2006. The accident year is not closed, so figures will change as long as there are claims payments related to claims occurred in that accident year, e.g. a claim payment made in 2009 for an accident which happened in 2007 will be attributed to accident year 2007.

Accounting year (also booking year) = Insurance figures, regardless of their original source date, are booked into that year of account which is open at the time of actually entering the figures in the books. Contrary to the underwriting and accident year, the accounting year is closed at some point in time, usually at the end of one calendar year, such that figures do not change any more once the accounting year is closed. These give the insurance results usually published in companies’ annual reports.

Explanation of terms used in this presentation (2)

Premium volumes shown in this report are (as defined in the Report Form):

Gross written premiums

- for direct marine insurance in the national market
- for the accounting years 2005 and 2006
- excluding:
 - all types of reinsurance (facultative and treaty, proportional as well as non-proportional),
with the exception of facultative reinsurance from a captive, which would not be reported
by another member association.
 - War risk premium.
- including:
 - all marine premium from the national market, if possible also premium written by insurers who are not members of the national association.

Above are the specifications of what IUMI members ideally should report. The actually reported figures may though possibly deviate from that. If such deviations and their impact on the figures is known to IUMI it is commented.

Explanation of terms used in this presentation (3)

Classes of business premium is reported for (as defined in the Report Form):

Global Hull =

-Ocean (blue-water) Hull Insurance

- Commercial vessels engaged in international trade under domestic or foreign flag.
- Interests included are: hull and machinery (H&M), disbursements, increased value, freight or other ancillary interests, loss of hire (LOH), construction risks.

-Coastal/Inland Marine Hull Insurance

- Vessels not included in the above category, trading in domestic waters or inland waterways, e.g. coasters, fishing vessels, tugs, lighters, barges, etc. Only premium relating to commercial vessels, pleasure craft is excluded (where possible).
- Interests included are: same as for ocean hull. Marine liabilities for this type of vessel are excluded (where possible), as these fall under "Marine Liability".

Transport/Cargo = all types of insurance relating to cargo, including freight forwarders, CMR and carriers liability, in transit whether on land, sea or air, domestic as well as international trade.

Marine Liability = insurance covering marine liabilities in respect of vessels classified as coastal/inland marine and also marine liabilities covering charterers, shiprepairers, stevedores, wharfingers, terminal operators and similar legal liability insurances. **P&I insurance placed with members of the International Group of P&I Clubs is excluded here** (where possible).

Offshore/Energy = insurance of all interests relating to offshore exploration and production activities, including both mobile and fixed units, construction risks. Figures relating to onshore (downstream) operations are excluded (where possible).
