Become an IPP and benefit from unrivalled access to the world's marine insurance underwriters.

The International Union of Marine Insurance (IUMI)

The International Union of Marine Insurance (IUMI) traces its roots back to 1874 and has been at the heart of the marine insurance sector ever since.

The organization has about 40 national (marine) insurance associations as members, and its aim is to protect and advance the interests of those members. It also acts as a single authoritative voice to represent and enforce the views and positions of the global marine insurance community with national and international government and regulators. Its annual conference provides an essential forum to discuss and exchange ideas, information and statistics of common interest. The IUMI newsletter, press releases and position papers give continuous information, updates and opinion to the membership and third parties.

In an effort to broaden the debate and exchange expertise and ideas within the marine insurance sector, the decision was made to create the opportunity for those businesses which provide a wide range of services to marine insurers to engage with the IUMI membership on a more formal level. This led to the creation of a new membership category: the IUMI Professional Partner (IPP).

The aim is to enable IUMI's members to access the expertise of our IPPs and in turn, to provide access for the IPPs to the broad membership of IUMI: not only during the annual conference but at other times too. IUMI's membership shall benefit from enhanced relationships with those IPPs.

IPPs have the opportunity to join the wider IUMI debates on the core issues affecting the market and to help ensure that IUMI's position is fully representative of the insurance market as a whole. Our IPP membership is open to four categories of third party firms and companies that are technical suppliers to the marine insurance industry.

These are:

- Legal/Law firms
- Surveying/Adjusting firms
- Business Intelligence
- Software and Data Providers / Analysts
