

New AIMU paper on Hull Builder's Risk exposures

By AIMU Hull Committee, 22nd March 2017

A sub-committee of the American Institute of Marine Underwriters' (AIMU) Hull Committee has published a new paper on Hull Builder's Risk exposures. The objective of the paper is to increase underwriters' understanding of the exposures and the underwriting issues surrounding this class of business. A PDF version of the document can be downloaded from the "Papers" section of AIMU's website:
