# New video raises awareness of cyber threats at sea

By Hendrike Kühl, 12th July 2017

The global maritime and offshore industry initiative "Be Cyber Aware At Sea" which was founded to raise awareness of the increasing maritime cyber threats to international shipping, ports and offshore operations, produced the short film to illustrate common threats related to online connectivity.The 6-minute video looks at cyber security in the maritime industry and gives simple, clear non-technical advice for seafarers and shore-based colleagues on avoiding the most common cyber threats.
