

Guidelines for the use of flexitanks

6th November 2024

We have recently issued a comprehensive paper offering guidelines for the use of flexible tanks for liquid bulk cargo. In this podcast we are joined by two authors of that paper: Captain Andrew Kinsey, Director of Marine Consulting at Integrated Speciality Coverages; and Nicolas Gabriel, Divisional Director & Consultant at Battermann & Tillery Global Marine. Together, they give an overview of the issues and challenges surrounding the increasing use of flexitanks and discuss IUMI's best practice recommendations.
