

What role can tech start-ups play in digitalising the marine insurance industry?

26th April 2023

On this special episode of the IUMI podcast, chair of IUMI's Data & Digitalisation Forum, Patrizia Kern, interviews Osher Perry, founder and CEO of Shipln Systems. Shipln offers onboard CCTV solutions for vessels that allows shoreside personnel to get the visibility needed during critical operations. It is also an IUMI Professional Partner.

Together, Patrizia and Osher discuss the digitisation of marine insurance, working with clients in an age of rapid digital expansion, accessing relevant data, implementing digitised business conduct, and much more.
